	two glasses of water or milk to dilute. Provide medical care provider with this SDS. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into lungs. If possible, do not leave individual unattended. If individual is drowsy or unconscious, do not give anything by mouth; place individual on left side with head down.
<b>Most important symptoms/effects, acute and delayed:</b>	May be fatal if swallowed and enters airways. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye irritation. Causes damage to organs. Causes damage to organs through prolonged or repeated exposure
<b>Indication of immediate medical attention and special treatment needed, if necessary:</b>	Specific treatment (see Sections 4 to 8 on the SDS and any additional information on this label).

## 5. Fire-fighting measures

### Suitable (and unsuitable) extinguishing media:

**Suitable extinguishing media:** Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid.. Regular foam

**Unsuitable extinguishing media:** No data available

**Specific hazards arising from the chemical:** Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and may travel to a source of ignition and flash back.

**Hazardous combustion products:** Carbon dioxide, Carbon monoxide, Styrene oxide, Phthalic anhydride, Hydrocarbons

**Special protective equipment and precautions for fire-fighters:** Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Wear a self contained breathing apparatus (NIOSH approved) with a full face piece operated in the positive pressure demand mode with appropriate turn-out gear and chemical resistant personal protective equipment. Water may be used to cool closed containers to prevent pressure build-up and possible auto ignition or explosion when exposed to extreme heat.

**Personal precautions, protective equipment and emergency procedures:** No health effects expected from the clean-up of this material if contact can be avoided. Follow personal protective equipment recommendations found in Section 8 of this SDS

**Methods and materials for containment and cleaning up:** No special spill clean-up considerations. Collect and discard in regular trash. Use an inert absorbent such as sand or vermiculite. Place in properly labeled closed container. Avoid breathing vapors. All personnel in the area should be protected as in Section 8. Activate available exhaust ventilation equipment in the immediate spill area. Shut off ignition sources; including electrical equipment and flames. Do not allow smoking in the area.

## 7. Handling and storage

**Precautions for safe handling:** Mildly irritating material. Avoid unnecessary exposure. Keep out of the reach of children. Keep container closed when not in use. Do not take internally. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Use with adequate ventilation Wash hands before eating Do not get in eyes, on skin and clothing All hazard precautions given in the data sheet must be observed.

**Conditions for safe storage, including any incompatibilities:**

**Safe storage conditions:** Store in a cool dry place. Isolate from incompatible materials. Avoid contact with incompatible materials. Store in a tightly closed container Keep away from heat, sparks, and flame For maximum product quality, avoid prolonged storage at temperatures above 75 °F (25 °C). Store in a cool dry place

**Materials to Avoid/Chemical Incompatibility:** Peroxides, Strong acids, Strong oxidizing agents, Polymerization catalysts

## 8. Exposure controls/personal protection

**Individual protection measures, such as personal protective equipment:**

**Respiratory Protection:** Respiratory protection may be required to avoid overexposure when handling this product. General or local exhaust ventilation is the preferred means of protection. Use a respirator if general room ventilation is not available or sufficient to eliminate symptoms. Use a NIOSH approved respirator designed to remove particulate matter and organic solvent vapors.

**Eye protection:** Wear chemically resistant safety glasses with side shields when handling this product. Do not wear contact lenses. Splash proof chemical goggles are recommended to protect against the splash of product.

**Skin protection:** Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene and wear a barrier cream and/or impervious surgical style gloves. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work. To prevent repeated or prolonged skin contact, wear impervious clothing and boots. Gloves should be made of neoprene or natural rubber. Protective gloves and proper clothing should be worn to prevent skin contact.

**Gloves:** Protective gloves are recommended when prolonged skin contact cannot be avoided.

**Other protective equipment:** To prevent repeated or prolonged skin contact, wear impervious clothing and boots. Gloves should be made of neoprene or natural rubber. Protective gloves and proper clothing should be worn to prevent skin contact. Splash proof chemical goggles are recommended to protect against the splash of product.

**General hygiene conditions:** Keep out of the reach of children. Keep container closed when not in use. Do not take internally. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Use with adequate ventilation. Wash hands before eating. Do not get in eyes, on skin and clothing. All hazard precautions given in the data sheet must be observed.
