

**EVERCOAT<sup>®</sup>**

**EVERCOAT<sup>®</sup>**

**BODY FILLERS**

No matter the repair  
challenge...EVERCOAT<sup>®</sup>  
offers the right Product!

**EVERCOAT<sup>®</sup>**

**QUANTUM™**  
10:1 Premium Lightweight Filler

- Sands 2x faster than traditional premium lightweight fillers
- First filler that is not mixed 50:1 (2%)
- Faster, more uniform mixing
- Returns vehicle to pre-accident condition

Part No.	Size	Units/Case
450	Half Gallon	4

**10:1 BPO Catalyst - Fast**

- Epoxy-enriched formula provides unsurpassed performance when mixed with Quantum 1
- Eliminates the need to adjust mix ratio "on-the-fly" as weather changes
- Ideal for use in colder temperatures and for small, quick repairs

Part No.	Size	Units/case
455	2.8 oz. Tube	12

**10:1 BPO Catalyst - Low Temp**

- Epoxy-enriched formula provides unsurpassed performance when mixed with Quantum 1
- Eliminates the need to adjust mix ratio "on-the-fly" as weather changes
- Ideal for use in cold temperatures and for small to medium repairs

Part No.	Size	Units/case
457	2.8 oz. Tube	12

**10:1 BPO Catalyst - High Temp**

- Epoxy-enriched formula provides unsurpassed performance when mixed with Quantum 1
- Eliminates the need to adjust mix ratio "on-the-fly" as weather changes
- Ideal for use in higher temperatures and for medium to large repairs

Part No.	Size	Units/case
458	2.8 oz. Tube	12

**RAGE® XTREME™** METALWOOD®  
High Performance Premium Lightweight Filler

- Designed for use under advanced waterborne and HAP-compliant coating systems
- Provides the ultimate in spreading and self-leveling
- Contains ZNX-7® for superior adhesion and featheredging on all metal substrates

Part No.	Size	Units/Case
120	Gallon	4
121	3-Gallon Pail	1
122	5-Gallon Air Pail	1

**RAGE® GOLD** METALWOOD®  
Premium Lightweight Filler

- Contains Hattonite™, a unique ingredient which reduces heat and friction created by aggressive sanding, making it one of Evercoat's easiest sanding body fillers
- Creamy formula is easy to mix and spread
- Contains ZNX-7® for superior adhesion and featheredging on all metal substrates

Part No.	Size	Units/Case
112	Gallon	4
113	3-Gallon Pail	1
114	5-Gallon Air Pail	1

**RAGE®** METALWOOD®  
Premium Lightweight Filler

- The first body filler that was Tack Free and Stain Free
- Eliminates the need for cheese grating or sanding with coarse papers
- Contains ZNX-7® for superior adhesion and featheredging on all metal substrates

Part No.	Size	Units/Case
105	Quart	12
106	Gallon	4
102	3-Gallon Pail	1
107	3-Gallon Air Cart.	2
108	5-Gallon Air Pail	1

**Z-GRIP®** METALWOOD®  
Performance Lightweight Filler

- Advanced blended resin technology
- Contains Hattonite™, a unique ingredient which reduces heat and friction created by aggressive sanding, making it one of Evercoat's easiest sanding body fillers
- Contains ZNX-7® for excellent adhesion and feather edging on all metal substrates

Part No.	Size	Units/Case
282	Gallon	4
284	3-Gallon Pail	1
283	3-Gallon Air Cart.	2
285	5-Gallon Air Pail	1

**LITE WEIGHT®**  
Professional Lightweight Filler

- High quality, clog free, lightweight body filler
- Smooth spreading makes for easy application and easy sanding

Part No.	Size	Units/Case
157	Quart	12
156	Gallon	4
159	3-Gallon Pail	1
166	3-Gallon Air Cart.	2

164	5-Gallon Air Pail	1

**HIGH PRODUCTION LITE WEIGHT®**  
Professional Lightweight Filler

- Smooth, creamy formula
- Tack free, clog free, lightweight body filler
- Smooth spreading makes for easy application and easy sanding

Part No.	Size	Units/Case
151	Gallon	4

**CHROME-A-LITE™**  
Professional Lightweight Filler

- Gold colored
- High quality, clog free, lightweight body filler
- Smooth spreading makes for easy application and easy sanding

Part No.	Size	Units/Case
839	Quart	12
838	Gallon	4
850	3-Gallon Pail	1
840	3-Gallon Air Cart.	2
841	5-Gallon Pail	1

Evercoat's MetalWorks® System is a family of premium body fillers and finishing putties that are specially designed to increase shop productivity. The MetalWorks® System is backed by the industry's original corrosion warranty. The MetalWorks® warranty honors the new vehicle O.E.M. corrosion warranty.(refer to warranty #703717)

THREE KEY BENEFITS OF USING THE METALWORKS® SYSTEM:

**1. Adhesion is our strength!**

- ZNX-7® allows the filler or putty to chemically bond to substrates such as, galvanized metal, aluminum, high-strength steel and other types of high-tech metals
- ZNX-7® eliminates peel back and allows you to featheredge the filler or putty to a smooth finish

**2. Save time sanding!**

- MetalWorks® products are tack free which eliminates sandpaper clogging and extends the life of sandpaper
- Formulated with quality resins and blended with special filler materials that allow the abrasives to cut easily with less resistance
- Selected products are formulated with Hattonite™, which greatly improves sandability by reducing sandpaper friction.

**3. Pinholes are counter productive!**

- MetalWorks® products are vacuum processed, therefore, having less air than other products
- Special air release additives, greatly reduces pinhole problems

**INTERMIXABLE SYSTEM**

No single filler works well under all conditions. MetalWorks® products can be custom blended together to adapt to various temperatures, viscosities and substrates.

To intermix, simply blend Metal Glaze® (#415/416) or Metal Glaze® O.E.M.™ (#413/414) with any of the MetalWorks® body fillers. Start by blending 1 part Putty with 4 parts Body Filler. If you want thinner material add more putty or add more filler for thicker material.
