1: CLEAN
Clean and degrease the body panel to be repaired.

2: STRAIGHTEN PANEL
Straighten the panel to be repaired as needed.

3: PAINT REMOVAL
Remove paint with 80 grit in the area to be filled.

4: PREPARATION
Sand and featheredge the area with 80 grit to remove only the clear coat and base coat, then remove sanding dust with clean compressed air.

5: APPLY
Apply Evercoat Quantum1 to repair area with firm even pressure in a thin coat, then apply additional material as needed.

6: SAND
Sand to shape with 180 grit.
For best results final sand with 180 grit using a DA Sander to remove straight line sand scratches.

7: REMOVE SANDING DUST AND INSPECT
Remove the sanding dust with clean compressed air and inspect area for coarse sand scratches or imperfections.

Quantum1™ provides a surface that sands easier than any 10:1 filler you've ever used. Our patented technology allows your shop to repair more vehicles in less time using less putty and less sandpaper.
