PRODUCT: HIGH PRODUCTION LITE WEIGHT® Plastic Body Filler

PART NUMBER: 100151 Gallon 4 units/case

DESCRIPTION: A smooth spreading, easy sanding auto body filler designed to sand to a fine finish.

APPROVED SUBSTRATES:
- Cold Rolled Steel
- Fiberglass

NOTE: For structural repairs prone to high degrees of stress and flexibility, use a fiber reinforced filler such as Everglass®, Kitty Hair® or Fiber Tech®.

PREPARATION:
- Clean and degrease the entire panel to be repaired with soap and water, followed by a mild cleaning solvent. Surface must be thoroughly dry before repairing or applying material.
- Keep the repair area small. Use 40-80 grit to remove the paint and featheredge.

MIXING:
- Stir the filler before using. Knead the cream hardener.
- Measure hardener 2% by weight (add a ribbon of cream hardener from edge to edge across the center of a 4” diameter puddle).
- Puddles larger than 4” (10 cm) in diameter will require additional hardener. Mix thoroughly until uniform color is achieved.
APPLICATION:

- Apply in layers with even firm pressure.
- Do not apply all at once.

FINISH:

- Rough shape with 40 – 80 grit (as needed)
- Sand filler with 80 grit or finer.
- Final sand repair and paint edge 180 grit.

For best results, apply a premium Evercoat polyester putty to provide a smoother finish and reduce the amount of primer surfacer needed for a quality finish.
