DESCRIPTION: Commercial Ultra is specially formulated to allow for extended work time of 10 minutes at 75°F (24°C). Manufacturers and technicians can mix and spread large quantities knowing they have enough time to work larger surfaces, saving time and increasing productivity. Contains patented EcoResin™ technology for unparalleled sanding qualities.

APPROVED SUBSTRATES:

- Steel
- Aluminum
- Fiberglass
- Stainless Steel
- SMC
- Sanded OEM Paint

NOTE: For structural repairs prone to high degrees of stress and flexibility, use a fiber reinforced filler such as Everglass®, Kitty Hair® or Fiber Tech®.

PREPARATION:

- Clean and degrease the entire panel to be repaired with soap and water, followed by a mild cleaning solvent. Thoroughly dry the surface before repairing.
- Keep the repair area small. Use 80 grit to remove the paint and featheredge with 180.

NOTE: Smaller repairs on OEM Paint can be prepared with 180 grit.

MIXING:

- Stir the filler before using. Knead the cream hardener.
- Measure hardener 2% by weight (add a ribbon of cream hardener from edge to edge across the center of a 4” diameter puddle).
- Puddles larger than 4” (10 cm) in diameter will require additional hardener. Mix thoroughly until uniform color is achieved.

NOTE: May be mixed with Evercoat Ultra products to adjust viscosity and work time.

APPLICATION:

- Apply in layers with even firm pressure.
- Do not apply all at once.
FINISH:

- Sand body filler with 80-180 grit sandpaper.
- If necessary, reapply to fill any pinholes or low spots, allow filler to dry and then sand with 180 grit sandpaper.
- Finish sand with 180 grit or finer.

TECHNICAL SPECIFICATIONS:

- Appearance: Off White Paste
- VOC: Refer to Section 9 of the Safety Data Sheet
- Relative Density: Refer to Section 9 of the Safety Data Sheet
- Work Time: 10 minutes @ 75°F (24°C)
- Max Recommended Thickness (sanded): See chart below for sand times by temperature
  - 1/4 inch (6mm)

NOTE: Properties are typical values and should not be considered as sales specifications. Physical testing performed @ ~75°F (24°C) / 75% RH unless otherwise noted.

SAFETY & HANDLING: Read all directions and warnings prior to using Evercoat® products. Safety Data Sheets can be found online at evercoat.com.

NOTES:

- Never return mixed filler to can
- Keep can closed and store in a cool dry place

USE WITH EVERCOAT CREAM HARDENER ONLY!
