PRODUCT: URO-FILL™ Acrylic Urethane Primer Surfacer

PART NUMBER:
- 102224 Gray Gallon 4 units/case
- 102234 Buff Gallon 4 units/case
- 102233 Activator Quart 6 units/case

DESCRIPTION: URO-FILL is an acrylic urethane primer surfacer that easily sprays to an ultra smooth texture. It is ideally suited for use over body filler, fiberglass, O.E.M. finishes and small areas of bare steel and treated aluminum. URO-FILL quickly finishes sands with fine grit sandpaper and provides an excellent base for today’s high tech finishes.

SUBSTRATES:
- Fiberglass
- SMC
- Rigid Plastics
- Body Filler or Putty
- Epoxy Primer or Self-Etch Primer
- Refinish Enamel/Urethane
- OEM Finishes

NOTE: For best adhesion and corrosion resistance, treat all bare metal areas larger than a quarter in diameter with a self-etch or epoxy primer prior to application.

CLEANING:
- Surface must be clean and free of dirt, oil, grease and wax
- Solvent clean all areas to be coated with a quality wax and grease remover and wipe dry with a clean, dry cloth
- To solvent clean raw, exposed fiberglass, it is recommended to clean exposed area with acetone.

PREPARATION: Untreated Steel, Galvanized Steel and Bare Aluminum
- Sand surface with 180 - 220 grit sandpaper. Blow off the surface with an air blow gun and solvent clean all areas to be coated with a quality wax and grease remover and wipe dry with a clean, dry cloth.
- Follow paint company’s recommendations for surface prep and recoat of self-etch primer

Pre-Painted Surfaces
- Sand repair area and featheredge using 80, 180, 220 and finish with 320 grit sandpaper on a random orbital sander.
- Final clean with a quality wax and grease remover to remove sanding residue before priming. Sand repair area and featheredge using 180 grit, 220 grit and finish with 320 grit sandpaper on a random orbital sander
- Final clean with a quality wax and grease remover to remove sanding residue prior to application
**Body Filler or Putty**
- Finish sanding body filler or putty with 180-220 grit sandpaper
- Featheredge with 320 grit sandpaper
- Blow off the surface with an air blow gun

**MIXING:**
- Shake and stir thoroughly before mixing
- Mix 4 parts URO-FILL to 1 part URO-FILL Activator #2233
- Pot life is 3 hours maximum @ 75°F (24°C)
- Mix thoroughly before pouring primer into the gun cup

**APPLICATION:**
- Use a primer gun with a 1.6 to 2.0 fluid nozzle/air cap
  (Spray at paint gun manufacturer’s recommended air pressure)
- Apply 2-3 medium wet coats allowing 5-10 minutes flash time between coats

**FINISH:**
- Ready to sand in about 2-3 hours depending on film build
  **Force Air:** Purge 10 minutes, Bake 30 minutes @140°F (60°C)
  **IRT:** Purge 5 minutes low bake, Bake 15 minutes full bake @ 24”-36”
- Once dry, sand with 400-600 grit sandpaper prior to next step

**SAFETY & HANDLING:**

IMPORTANT: The contents of these packages must be mixed with other components before the products can be used. Before opening the packages, be sure to understand the warnings on all labels of all components since the resulting product will have the warnings and cautions of all its parts. Improper spray technique may result in hazardous conditions. Follow the spray equipment manufacturer's instructions to prevent injury or fire. Follow respirator manufacturer's directions for respirator use. Always wear eye and skin protection. Observe all precautions. Consult MSDS for further safety information and/or handling instructions. In case of emergency, contact your local emergency room or poison control center immediately. For professional use only. Material Safety Data Sheets can be found online @ evercoat.com.
