

EVERCOAT®  
Fibreglass  
Evercoat

# Easy Sand™

The name says it all!

Formulated  
with miracle  
sanding  
Hattonite

Speed up your repairs with Evercoat's® new  
easiest sanding pourable putty.

Part No. 100420  
24 Oz. Tube

Part No. 100421  
30 Oz. Pump Bottle

Best uses are:

- Large skim coat areas
- New panel imperfections
- Finish coat for body filler
- Quick spot filling, door dings, spot welds, pin holes, etc.
- Hail damage
- Deep scratches
- Finishing SMC and fiberglass work

# Easy Sand™

## Flowable Polyester Finishing and Blending Putty

Evercoat's new Easy Sand™ putty was engineered to reduce labor time and speed up repair processes without sacrificing quality. It is formulated with Hattonite, a unique ingredient that reduces heat and friction generated from aggressive sanding. This allows for faster sanding times, plus it extends the life of your sandpaper.

Easy Sand provides a strong bond to galvanized steel, aluminum, SMC and most other common automotive substrates. It is part of the MetalWorks® System that offers a written corrosion warranty for new panel repairs.

<u>Features</u>	<u>Advantages</u>	<u>Benefits</u>
• Flowable viscosity	* Self levels, reducing surface texture and spreader drag marks	* Saves sanding time * Eliminates re-work
• Includes Hattonite	* Reduces friction and sandpaper drag for faster sanding * Reduces heat and acts as a sandpaper lubricant	* Saves labor, increases productivity * Extends the life of sandpaper, saves money
• Formulated with ZNX-7	* Speeds up cure over zinc (galvanized steel) * Improves adhesion to zinc and aluminum	* Sands sooner, faster unit throughput * Insures quality of repair, meets customers expectations
• Offers a written corrosion warranty	* Restores the original OEM corrosion warranty back to pre-accident condition	* Adds value to the repair and shop service
