

FOAMS

Maxim™ two-component Flexible and Rigid Urethane Foams are designed to duplicate the performance of OEM foams. Flexible Foam fills voids and stops vibrations and flutter in door panels, hoods, trunks and roof panels. Rigid Foam fills posts, pillars and cavities for reinforcement and reduced noise and vibration.

Flexible Foam

- Does not warp panels
- Excellent sag resistance
- Can be painted

Flexible Urethane Foam #837

Rigid Foam

- Adds strength
- Excellent adhesion
- Eliminates condensation

Rigid Urethane Foam #834
