

SUBJECT: Batch Code Revision Effective 7/10/19

Evercoat filler and putty products will begin using an extended batch code with a four-digit sequence identifier to show when the product was filled in the batch production. This will help to identify where the product was filled during the packaging sequence from start to finish.

9	04	094	XXXX	
9	04	094	XXXX	
↑	↑	↑		
Year (2019)	Month (April)	Batch # in month	Production Sequence (0001 up to 9999)	
01 =January	02 =February	03 =March	04 =April	05 =May
06 =June	07 =July	08 =August	09 =September	10 =October
11 =November	12 =December			

Example above shows the 697th can in production and the 702nd cans from this filling sequence.

NOTE: Specialty products such as Kitty Hair, Tiger Hair, Gel Coats, Resins, Primers, and Skid-No-More that have a stickered batch code will continue to use the existing format until further notice.
