

SUBJECT: Batch Code Revision Effective 8/1/23

As of August 1st, 2023 Evercoat products (filler, putties, polyester primers, resins, and gel coats) will begin using a seven-digit batch code numbering system to better identify the year of production with two digits in lieu of the previous six-digit batch code with only one digit to identify the year of production.

NEW FORMAT

OLD FORMAT

NEW FORMAT (7 digits)

23	08	058	001320
↑	↑	↑	
Year	Month	Batch # in month	1,320 th can filled in production
(2023)	(August)		Production Sequence
			(000001 up to 009999)

01 =January	02 =February	03 =March	04 =April	05 =May
06 =June	07 =July	08 =August	09 =September	10 =October
11 =November	12 =December			

OLD FORMAT (6 digits)

3	07	085	001336
↑	↑	↑	
Year	Month	Batch # in month	1,336 th can filled in production
(2023)	(August)		Production Sequence
			(000001 up to 009999)

01 =January	02 =February	03 =March	04 =April	05 =May
06 =June	07 =July	08 =August	09 =September	10 =October
11 =November	12 =December			

This new format will also include a six-digit sequence identifier to show when the product was filled in the batch production. This will help to identify where the product was filled during the packaging sequence from start to finish.

NOTE: Specialty products such as Kitty Hair, Tiger Hair, Gel Coats, Resins, and Primers will have a stickered batch code until further notice.
